CLEANLINESS AT THE TOUCH OF A BUTTON

GENTLE PERSONAL HYGIENE

With an additional shower spray, the gentle lady shower ensures personal hygiene using pure water.

NO UNPLEASANT ODOURS

The odour extraction unit removes unpleasant odours as the system starts automatically upon sitting.

GENTLE DRYING

For soft, gentle drying, the warm air dryer is the perfect solution and features five individually adjustable temperature settings

COMPLETELY USER-ORIENTED

Thanks to the proximity sensor, functions such as water heating, toilet seat heating or orientation light start automatically upon approach.

PERSONAL WELL-BEING PROGRAMME

The intuitive remote provides hand-held control and the touch of a button is all it takes to call up personal settings.

PERFECT CLEANLINESS

The oscillation function gently moves the spray arm back and forth to ensure the feeling of exceptional cleanliness. Both the position of the spray arm and intensity of the spray can be personalised.

SUPERIOR COMFORT

The ergonomically optimised toilet seat made of high-quality thermoset is fitted with integrated heating.

PERFECT CLEANLINESS

For the last 35 years, Geberit has been continuously perfecting the spray function.

WHY A GEBERIT AQUACLEAN? FOR YOUR WELL-BEING

Would you wash your hands with paper or use a dry form of cleaning instead of taking a shower? Hardly. Cleanliness is not possible without water. Thus, just as a daily shower has become the norm, Geberit is driving in a sustainable change in the bathroom hygiene, the AquaClean shower toilet. At the push of a button, you can feel as fresh after using the toilet as if you'd just taken a shower.

Individuals who value their well-being will be thrilled with the gentle and natural cleaning of the AquaClean shower toilet. Thanks to the perfect interaction of design and technology AquaClean does not require any more space than conventional toilets.

A CLEAN AFFAIR

At first glance, modern shower toilets are virtually indistinguishable from the traditional alternatives. The spray arm is found in a well-protected park position. The spray nozzle is flushed automatically before and after use with fresh water, which means that it always stays clean.

STARTING THE SHOWER WASH

The shower wash is started at the touch of a button. The spray arm moves forward from its park position at an oblique angle. A few seconds later, a pleasant pulsating shower spray at body temperature is felt on the skin.

REGULATING THE SHOWER SPRAY

The intensity of the pulsating shower spray is regulated according to personal preference. The shower procedure can of course be switched off at any time.

HYGIENE MADE EASY

When it comes to hygiene and cleanliness, Geberit accepts no compromise in the development of the AquaClean. The almost entirely self-cleaning AquaClean shower toilets are noteworthy for their high-quality product materials. Thanks to integrated technology, inaccessible areas are significantly reduced and hidden places where grime could collect are avoided. The scratch-resistant KeraTect® special glaze provides long-term protection for ceramic surfaces. The virtually pore-free, extremely smooth surface protects against bacteria and germs and can be kept clean, easily and efficiently. Furthermore, to prevent scaling, Geberit has developed an automatic descaling programme to ensure the long-term performance capability of the shower toilet, completely independently of the water hardness level.

www.geberit-aquaclean.com/hygiene

KeraTect®

RIMLESS CERAMIC PAN WITH TURBOFLUSH TECHNOLOGY

Turboflush technology ensures a flushing performance that is unrivaled rinsing cleaner and more economically than a normal flush – and is much quieter.

SIMPLE REMOVAL OF SEAT AND LID

The QuickRelease function makes it easy to remove the WC seat and lid in next to no time. This makes cleaning quick and easy. The fastenings also remain free of deposits.

DESCALING

A specially developed descaling programme removes deposits from all water-bearing parts, making descaling easy. Both the remote control and the control panel indicate when descaling is necessary.

CONSISTENTLY CLEAN

The automatic pre- and post-cleaning process ensures that the spray arm is truly clean. The spray arm is automatically rinsed with fresh water before and after each use.

RIMFREE® CERAMIC PAN

The Rimfree® ceramic pan ensures perfect hygiene. Thanks to its optimised water guide, the entire inner ceramic surface is completely rinsed with much easier cleaning. And since it is rimless, there are no hidden areas where deposits can build up.

MEET THE DESIGNER

Geberit AquaClean shower toilets stand out with their eye-catching design, while at the same time leading with their many intelligent comfort functions. They offer little indication of this at first glance, giving practically no hint of the innovative, revolutionary technology hidden behind their beautifully designed bathroom ceramic.

"AquaClean shower toilets offer extensive user benefits; durability, superior quality, innovation and high technology."

This harmonious interaction between technology and design is the result of close cooperation between Geberit and the industrial designer Christoph Behling. The miniaturisation of the technology helped create the lean, simple design elegance of the AquaClean Tuma. All electrical and water supply connections have been cleverly concealed within the products themselves.

"For me as a designer, it means that I want to get the best out of a product in order to meet this demand for both quality and sustainability. Design must never be fashionable. It has to be timeless."

"The challenge to me as a designer is making sure that the AquaClean shower toilets do not look like technical devices, but rather fit harmoniously into the bathroom thanks to their design."

ABOUT THE DESIGNER

Christoph Behling studied Industrial Design at the Academy of Art and Design in Stuttgart in the mid-1990s. He founded the Christoph Behling Design Studio in 2004. Behling works with numerous international companies, including the luxury watchmaker TAG Heuer, where he is the chief designer.

HIGH LEVEL OF SAFETY FOR DRINKING WATER

Geberit AquaClean shower toilets are in compliance with all relevant provisions and drinking water standards, including among them the SVGW directive W3/E1 (EN 1717). Thanks to an integrated, backflow-protected water supply connection, Geberit meets this standard and ensures that the shower toilets cannot cause contamination of the drinking water network under any circumstances. Furthermore, no additional sanitary appliances need to be installed.

GEBERIT AQUACLEAN TUMA

SURPRISINGLY VERSATILE

The Geberit AquaClean Tuma Classic is the ideal model. It offers the functions of a shower toilet at an attractive price. For those who would like to treat themselves with additional comfort functions, the AquaClean Tuma Comfort also offers additional features such as WC seat ring heating and a warm air blower. The AquaClean Tuma is available as a WC complete solution with a perfectly fitting Rimfree® ceramic pan and hidden connections for electricity and water, or as a WC enhancement solution that can also be combined with a variety of previously installed ceramic pans.

www.geberit-aquaclean.com/tuma

With the Geberit AquaClean Tuma you can choose the features you want in your shower toilet: from the simple, basic functions of the Classic model to the additional convenience functions of the Comfort version. The AquaClean Tuma is available as a complete toilet solution with a perfectly fitting Rimfree® ceramic pan and hidden connections for electricity and water, or as a toilet enhancement solution. It can also be combined with a variety of previously installed ceramic pans.

NEW

GEBERIT AQUACLEAN FLOOR-STANDING SOLUTIONS

DURABLE, PRACTICAL, APPEALING

Whether your project is a new building, an extensive renovation or a soft renovation, floor-standing shower toilets provide the ideal solution for any bathroom. With a clean-lined appearance and familiar features that they share with their wall-hung counterparts, both of our models are real standouts.

The AquaClean Tuma is available as both wall-hung and floor-standing models. The compact ceramic pan blends seamlessly into almost any bathroom environment.

The model can be connected directly to the wall or extended to include the Geberit Monolith sanitary module, depending on what suits the constructional situation. This floor-standing shower toilet is available in both Comfort and Classic models.

QUICK AND EASY STEPS TO **YOUR VERY OWN SPA**

BATHROOM MODERNISATION WITH GEBERIT MONOLITH

Where an exposed cistern is already present or when time, budget or basic structural considerations do not permit invisible integration of the flushing cistern behind the wall, the Geberit Monolith offers a stylish alternative. A slim flushing cistern and the required sanitary technology are housed under an elegant glass surface. The Monolith is designed in such a way that it can be mounted quickly and with little disruption.

THE SHINING LIGHT

The Geberit Monolith Plus offers state-of-the-art flush technology for toilets, exclusively packaged in a glass and brushed-aluminium shell. The flush is activated by gently touching the sensor buttons. A subtle orientation light discreetly guides the way to the toilet at night, with seven different colours available.

ODOUR EXTRACTION

An integrated odour extraction unit absorbs odours directly into the toilet ceramic to ensure nothing can spoil the fresh feeling in your bathroom.

SOFT TOUCH

A gentle touch is all it takes to flush the Geberit Monolith Plus.

QUALITY YOU CAN FEEL

Safety glass and elegant, brushed aluminium accentuate the sophisticated design.

SIMPLY UNCOMPLICATED

SOLUTIONS FOR ALL CONSTRUCTION SITUATIONS

There are very few bathroom designs in which a Geberit AquaClean shower toilet cannot be installed. All that is required is an electrical and a water supply connection.

GEBERIT TOILET INSTALLATION FRAMES

In new constructions or when undertaking extensive renovations, the Geberit toilet installation frames with concealed cistern provide a reliable solution. The connections for water and electricity are already pre-planned and make mounting very easy.

A SUSTAINABLE QUALITY PRODUCT

Starting from the time of installation, Geberit offers as standard a two-year end user warranty and assumes responsibility during this period for free replacement of defective parts. If the product was installed and registered by an installation company, then Geberit will extend the warranty period by one year and will replace the defective parts in the event of product material or production faults.

Please register with the warranty
card you received with the product.

WC complete solutions from Geberit score highly with regard to life cycle assessments and are comparable to conventional toilets and with the consumption of toilet paper. The additional water consumption for a shower toilet plays a secondary role compared to paper consumption. Of central importance on the other hand are the manufacture of the toilet paper and the electricity consumption for heating the water. Individual settings with the Geberit AquaClean products enable additional energy savings and further reductions in terms of environmental impact. In standby mode (economy mode), energy consumption for all AquaClean models is no more than 0.5 watts. All AquaClean models are equipped with an economy mode and fulfil the European Ecodesign requirements (ErP directives).
